

Java Coffee Program

The Java Classics program is designed to maximize gross profits and has an outstanding product. That's why Merchants Grocery Company has partnered with Java, to give you a successful and fabulous tasting coffee program. The patented Convection Roast System roasts coffees which are proven to endure longer hold times with no breakdown in taste.

Java Classics is made of only the highest grade 100% Arabica beans. All of the coffees are roasted in our patented convection roasting system which ensures that each bean is roasted evenly throughout. Unlike traditional roasting methods that can sometimes burn beans or leave them under-roasted, our air roasting process leaves behind nothing but smooth and rich flavor.
